

Using TinyPic to post pictures at PPBB

After you download your pictures from the camera to your computer, use your photo-editing software to reduce the size of the image to 640 by 480 for routine postings. Spectacular pictures can ignore this.

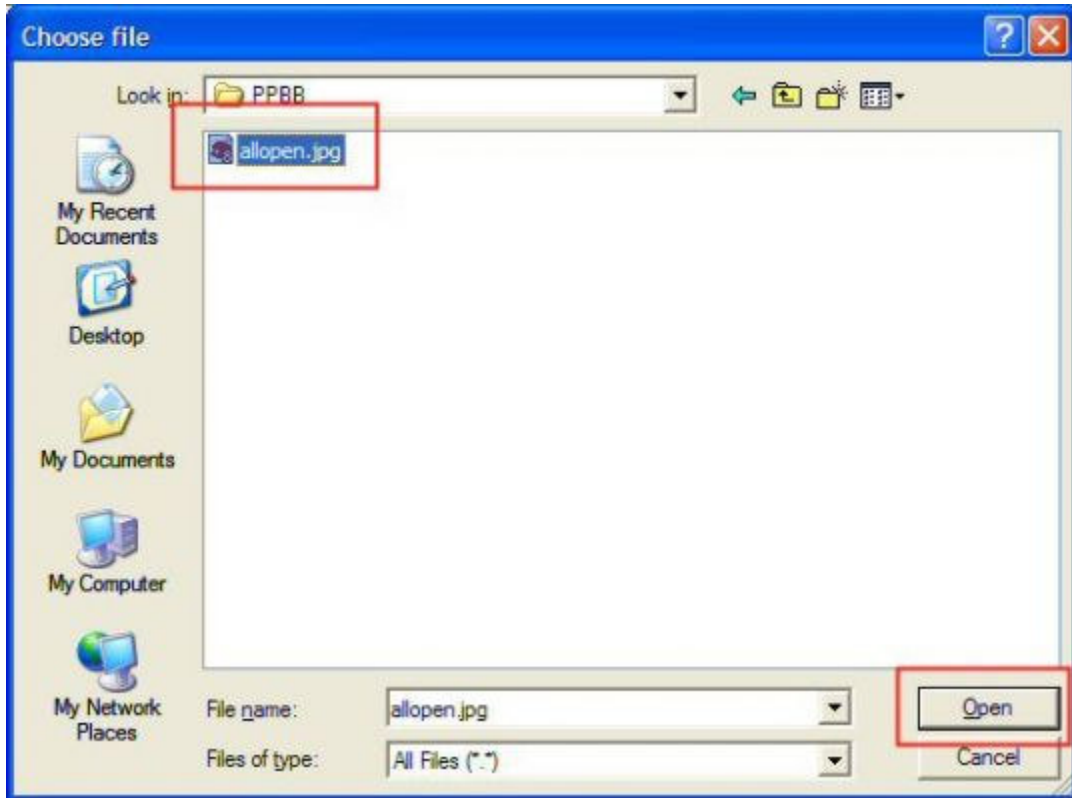

Usually, the editing software has a section called image that allows you to pick one dimension in pixels and it self adjusts the other dimension.

Once reduced, save the picture in a place easy to find on your computer with an easy to find name.

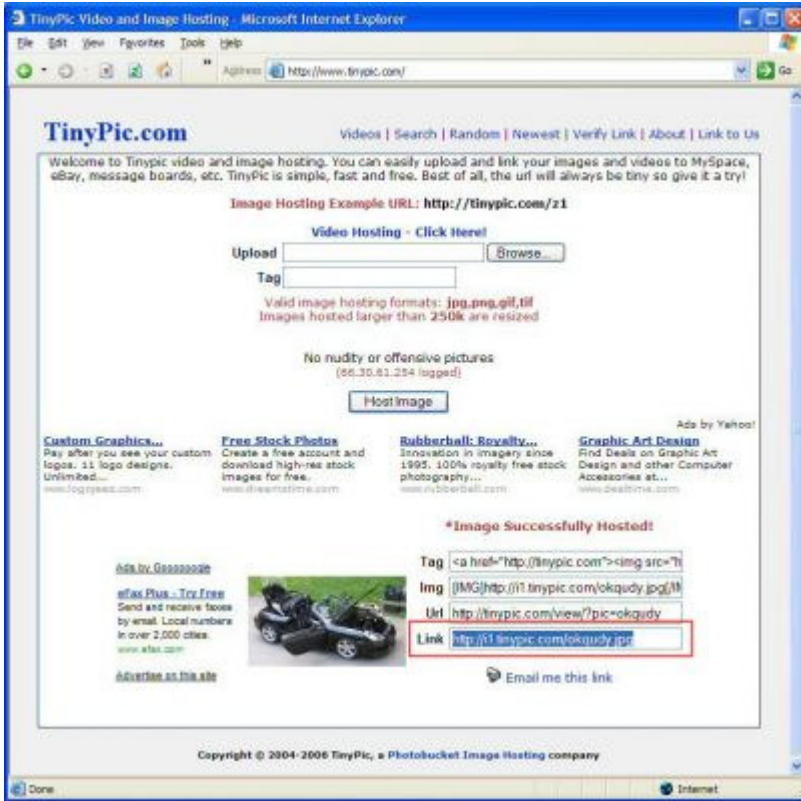

Now go via the browser of your choice to www.tinypic.com and use the browse button shown below to find that picture file you just stored on your computer.

Go to www.tinypic.com and click the browse button to select the file from your computer you want to display.

Select the file you want to upload, click Open then on the tinypic page click "Host Image".

If you are posting a single picture copy the Link text from the last box on the resulting page.

Message: NO ADVERTISEMENTS! Use the classifieds for that, here they will be deleted.
If your post is deleted, please contact [The Deputies](#) (click here to email them) and ask for clarification via email.
DO NOT, DO NOT, DO NOT, DO NOT ASK ON THE MAIN BOARD!!! :

This is how a single picture post appears.

If you'd like to include a link to another page with your message,
please provide both the URL address and the title of the page:

Optional Link URL:

Optional Link Title:

If you'd like to include an image (picture) with your message,
please provide the URL address of the image file:

Optional Image URL:

If you'd like to have the option of deleting your post later,
please provide a password (CASE SENSITIVE!):

Paste the copied link in to the Optional Image URL box and post your message.
